## BASEBALL GALORE.

CITY TEAM LOSES ONE AND  
WINS ONE.

Our Citizens will Have a Chance  
to See a Game for Blood  
on Sunday.

The game of baseball on Thursday afternoon between the Chicago Unions, a colored aggregation, and the local team, resulted in a victory for the colored gentry by a score of 5 to 2.

The Unions made three of their runs in the first inning, and it looked as if it would be a walkaway for them, but the local team got down to business and held the visitors down the other eight innings to two additional runs.

When the locals went to bat in the ninth inning they had not scored a run and it was plainly to be seen that the darkies wanted to shut them out the worst way, but the boys got two men on bases and then made a safe hit, and by the time the smoke had cleared away they had got in two scores.

The darkies were quite free with their josh, and there were some amusing hits made during the game. There was a good crowd in attendance and everybody seemed well satisfied with the game.

Bancroft Was Too Weak.

The local baseball team met Ban-

croft at the fair grounds on Sunday and it was a walkaway for the Grand Rapids team from start to finish, the score standing 13 to 6 at the end.

Gorman started to pitch for the locals, but it was so easy that Perzold, who had been catching, went into the pitcher's box, and Gorman took them off the bat. Perzold does not pretend to be a pitcher but he is quite a mystery for the visitors and their effective hits were few and far between. It was only a practice game for the boys and they did not have to exert them selves at any time.

**Business Men Meet.**

The business men of Grand Rapids met the business men of Neosho on Sunday in a marked game of baseball, but the affair was called a draw, owing to the fact that the game was stopped at the end of the eighth inning with the score standing at 16 to 16.

Those taking part in the team from this city were L. M. Schlatter, Chas. Laheeck, Dr. Frank Pommerville, W. E. Wheeler, Gus Schmitz, Nathan Church, Frank Steib, Tony Billings, Ed. Kostka, Geo. Link, They intend to play two more games to settle which is the better aggregation.

**Will Play for \$100.**

On Sunday next the Neosho and Grand Rapids baseball teams will meet in this city in a game for \$100 a side. These teams have not one, but the game was not satisfactory to all concerned and each feels as if they could win out if given another chance, and they are willing to back their belief with the goods.

The Grand Rapids boys feel that they can give their adversaries such a race that the Neosho boys will be still hunting for the ball long after the time that they ought to be home.

milking the cows.

## Just for Fun

"Say! If you have any building to do this season or any repairs to make about the place—suppose you drop in—just for fun—and let us show you some lumber prices.

And by the way, weren't you saying something about neeling shingles? We have a lot of the slickest Washington neeling shingles? We have a lot of the slickest Washington neeling shingles ever put on a roof and they are cheap too. Come in and take a look at 'em.

## ACCIDENT AT PORT

FOUR MEN FALL TWENTY FEET WITH SCAFFOLD.

Miraculous Escape From Death for the Entire Party of Laborers.

Through the falling of an 11 beam at the Port Edwards paper mill on Sunday four workmen who were on a scaffold were thrown to the floor, one nearly and severely bruised, and the fact that any of them escaped with their life was almost a miracle.

The men on the scaffold were Charles Shearier, Herman Seuraw, Chas. Gross and George Payne. Some workmen were handling an 11 beam above the scaffold when it got away from them and fell, striking the scaffold, broke it loose from the fastenings, and allowed it to fall a distance of twenty feet. When help arrived on the scene of the accident the beam was found lying across the floor.

George Payne had two ribs broken and had sustained numerous bruises and scratches. Chas. Gross had both ankles badly strained, but no bones broken. Charles Shearier got a heavy blow on the side of the head and was badly shaken up, and Herman Seuraw was bruised and injured internally.

Medical assistance was summoned at once and everything possible was done for the injured men and they have since been getting along so nicely that it is not anticipated that they will suffer any permanent injury.

The company is engaged in putting up new floors in the mill and it was while engaged in this work that the accident happened.

R. Knox was also hurt in the same mill on Friday. He was engaged in working about one of the machines when he stepped thru a hole and fell to the floor below, a distance of 20 feet. He fractured two ribs, sustained a seedy wound and had both arms badly bruised, but escaped with his life. He was aware that the hole was in the floor, but had forgotten about it and stepped backward and fell then.

Everything considered, the accidents were very lucky ones, as the distance the men fell is enough to generally prove fatal under ordinary circumstances.

**A Wedding Anniversary.**

There was quite a celebration at the club house of the Crooked Rift Rod and Reel Club on Thursday evening of last week, the principals in the event being Mr. and Mrs. A. M. Muir, while the numerous guests at the club house vied with each other to make the affair a success. The occasion was the 10th wedding anniversary of Mr. and Mrs. Muir.

This worthy couple had gone fishing up the river that day and during their absence those at the club house got busy and decorated the place in appropriate style for the occasion against their return, and the house was a veritable bower of evergreens and wild plants from the woods. The Lohengrin Wedding march was played by Miss Katie Kellogg, and the bride was escorted by Mr. Chas. Kellogg and the bridegroom by Mrs. C. E. Lavigne. The gift of the occasion was presented with an appropriate speech by Dr. O. T. Hough, to which Mr. Muir replied in a few well-chosen words.

The unveiling of a three story wedding cake, a marvel of the bakers' art, was the occasion of much joy when Mr. Kellogg made some remarks that were appreciated by all. After the wedding supper the remains of the feast were cleared away and the evening was spent in dancing. Those present consider it an event of their life and report it one of the most enjoyable occasions since the club was organized.

**Holser-Schroedel.**

On Thursday evening last at eight o'clock occurred the marriage of Rev. George Schroedel of Hurley to Miss Eta Heiser of Sigel, the wedding occurring in the Lutheran church at Sigel. Rev. Mr. Baese of Neekoosa officiated. Rev. Mr. Baese of Sigel officiating. The bride was supported by Misses Martha and Frances Hauer and Amelia Schroedel, and Rev. Mr. Schroedel, Andrew Schroedel and Paul Sauter of Ironwood accompanied the groom.

Mr. and Mrs. Schroedel left on Tuesday for Hurley where they will make their home, and where Mr. Schroedel is pastor of the Lutheran church.

Both of the young people were well known in this locality and have many friends, who will extend their best wishes for a happy journey thru life.

**Water Main Nearly Fixed.**

Andrew Peterson, a diver, has been at work on the water main across the river since Saturday and he has the break nearly repaired. The old pipe was found to be pretty badly broken up where it had been struck by the ice, and the entire connection between the ball sockets was taken up from the river and a new joint will be put in. It is expected that the job will be finished this week.

**Library Hours.**—The public library will be closed Tuesday and Thursday evenings during the months of July and August.

## LETTER FROM SCOTLAND.

George B. McMillan Writes of His Travels Abroad.

Glasgow, July 5, 1904. Editor:

It is now 9 p. m. and not

dark enough to light the gas. I in-

tended and I partly promised

to write you for the Tribune but

there is so much to write about that

it would be interesting to many that I

would do justice to it, so thought

we would wait until our return.

Coming in sight of the old bog Saturday

evening was a grand sight and sailing

up the Clyde with the various inlets

of the fields was beautiful. Yesterday

we took in Loch Lomond, also

the Lochs and Loch Katrine

where Glasgow gets her water and

distances distant, sailed around Els-

dale made immortal in "The Lady of

the Lake," says Rodger Duff's prison,

also the cave of the giant, the

green where he hid in Stirling Castle.

They claim part of the castle was

built in 50 A. D., when the Romans

invaded Britain. Also climbed to

the top of Wallace's monument, the

one we climbed 1800 feet, the men

were 230 feet. The sword, which

is at least six feet in length and

one and a half inches in diameter, is in a

glass case. I enclose a flower from

the field of Bannockburn I plucked

near the Burn Stone (that is where

Bruce planted the flag) also was in

the house where James III was stoned

to death.

Opening Address by the President

GRAND RAPIDS, WISCONSIN.

## TELEGRAPHIC BREVITIES

Nearly a dozen people were injured in the department of the north-bound train on the Paris-Chicago line of the Gulf, Colorado and Santa Fe railroad, nine miles south of Dallas, Tex.

Edward Gubser, a well-known farmer residing eight miles north of Carle, Ill., while cutting oats with a self-blinder, was thrown from the machine by a runaway team and fell in front of the scythe bar. He was terribly lacerated.

Officials of the Italian government are without information regarding the statement cabled from Rome and circulated in the United States that Emperor Menelik of Abyssinia has decided to send Rui Makonnen, one of his principal advisers, as minister to Washington.

Senator Charles W. Fairbanks has left Indianapolis for Mackinac, where he will rest for a fortnight.

George Greville, British minister in the City of Mexico, who has long been absent from his post because of illness, has recovered and is expected to return to Mexico in August. Conn. Vinal, the Italian minister, it is reported, will remain in Italy, as he is in poor health.

Sir William McGregor, recently governor of Lagos, who has been appointed governor of Newfoundland in succession to Sir Gavendish Boyle, is expected to assume his office next month.

The Second regiment has finished its encampment duty for 1904 at the Wisconsin military reservation.

Charles Schaeffer, one of the wealthiest farmers of Warren county, Indiana, was fatally injured by being struck in the breast by a hay fork falling from a cart.

Sir William Van Horne and George H. MacLay have been elected directors of the International Banking corporation, taking the places of James H. Hyde and W. H. McIntyre.

William Kennedy, president of the defunct Citizens' bank at End, Okla., was arrested, charged with making false statements of the bank's condition. He entered a plea of not guilty and was placed under bond of \$4,000.

Rudolph Spreckels of San Francisco, who is seriously ill with appendicitis at the Savoy West End hotel, Carlsbad, is somewhat better at present. An immediate operation is apparently unnecessary.

Secretary May left Washington for Lake Sunapee, New Hampshire. He probably will be absent until about the 1st of October unless some emergency arises requiring his presence in Washington.

Frank McNutt, former resident of Richmond, Ind., and a member of the United States diplomatic corps at various posts, has been reappointed chamberlain by Pope Pius, having held that position under Pope Leo.

John Erelson of Chicago was drowned Monday afternoon while swimming in Williams bay, Wisconsin.

Three daughters of Frank Keenan, aged 20, 19 and 15 years, and Mrs. James Hubbard and child were drowned while bathing near Meter, Va.

Mrs. George W. Carline and Mrs. Alice Buckley were killed by the explosion of a can of gasoline in Buffalo. Thomas Ryan, aged 12, was badly burned.

The Sherrers' conclave at Atlanta City closed after electing George L. Brown of Buffalo imperial potentate. The next meeting place will be Niagara Falls.

Alex J. McLeod, aged 40; his nephew, Angus Ross, aged 14, and his niece, Marjorie Ross, aged 12, were drowned at Halifax, N. S., by the capsizing of a sailboat.

Premier Bond of Newfoundland is expected to sign a compromise agreement reached by the British and Newfoundland governments regarding the fishery regulations under the Anglo-French truce.

The man who committed suicide at St. Louis by shooting after attempting to destroy all possible means of identification has been identified as that of Charles Durr, son of Andrew Durr of Washington, D. C.

Two hundred manufacturers of candy from all parts of the country are attending the twenty-first annual convention of the National Confectioners' association of the United States, which is in session in Detroit.

The United States army transport Thomas has arrived in San Francisco from Manila. Besides a number of cabin passengers she brought 304 enlisted men from the Teuton, Thirty-eighth, Eighty-fifth and One Hundred and Eighth coast artillery. 368 men from various commands, eighty discharged soldiers, eighteen marines and thirty-eight prisoners.

A movement has been started to make Chicago the headquarters and regular meeting place of the International Longshoremen and Marine Transport Workers' association, and the plan is being considered by the convention now in session at Milwaukee.

The Canadian Commercial club has been formed at the City of Mexico for the purpose of encouraging trade with Canada. The efforts of the Canadians to promote trade with Mexico are cordially seconded by the governments of the two countries.

Charles S. McNichols, now a special Indian agent, has been appointed superintendent of the Umatilla Indian school in Oregon.

Brig. Gen. A. W. Greeley, chief signal officer, will attend the formal opening of the government cable between Seattle and Sitka, Alaska.

Five prisoners escaped from the Chillicothe, Ohio, jail immediately after the religious services, the leader knocking down the minister who officiated. Rev. Mr. Thompson. Four were recaptured, but the fifth, Daniel Foley, is still at large.

Reports from Ashland, Wis., say there is great danger of forest fires on the south shore of Lake Superior. The great bank of smoke hanging over Chequamegan bay is caused by a large forest fire between Bayfield and Port Wing, which are under a pall.

Roscoe Howard of Hobart, Ind., accidentally shot and killed himself while cleaning a shotgun.

First Assistant Postmaster General Wyrane is acting postmaster general in the absence of Postmaster General Faure, who is on a fortnight's outing.

## PAUL KRUGER IS DEAD

"Lion of the Transvaal" Breathes His Last at Clarens, Switzerland.

Paul Kruger, former president of the Transvaal republic, died at Clarens, Switzerland, July 11, from pulmonary and appendicitis heart weakness. His daughter and son-in-law were with him at the time of his death. He had been out only once since his arrival at the beginning of last month.

Mr. Kruger, who was staying at Villa du Bois, had been gradually failing for a long time, but he was able to attend to his affairs, read the newspapers and receive visits until Saturday. He became unconscious Monday and remained so until his death. Suddenly the doctor, he was attended by his own physician, Dr. Heymann, and by his secretary, Mr. Reuter. On several occasions Mr. Kruger had expressed a desire to be buried beside his wife in his own country.

Widespread Regret in France.

The death of Paul Kruger has aroused widespread regret in France, owing to French sympathy for the Boer cause and personal admiration for the ex-president. When he recently left Mentone his health was gradually failing through old age, constitutional disorders and throat troubles, which threatened to extend to the lungs. However, his personal physician, Dr. Heymann, did not apprehend a speedy crisis, and Mr. Kruger himself resisted the idea that his physical powers were failing. He had arranged to return to Mentone next fall, again localizing the pleasure-villa which he had occupied on the outskirts of the town.

Nevertheless, his near friends recognized that Mr. Kruger's once robust constitution was gradually going to pieces. Visitors described him as

PAUL KRUGER.

being a pathetic figure of calm endurance. His eyesight had dimmed, but he sat much at times with his Bible open before him, uttering well-known passages. He avoided references to the Boer war, but when it was occasionally mentioned, he showed no resentment and expressed the belief that Providence would eventually render justice to the Boer cause.

Mr. Kruger received few visitors, but waived his usual session to permit the presentation of the French gift, raised through popular subscription, expressive of the republic's admiration, and he also received private gifts, one being a considerable legacy from a Boer admirer. But before leaving Mentone he returned the legacy to relatives of the decedent.

### Kruger's Remarkable Career.

Stephano Johannes Paulus Kruger, who was the central figure in the Boer war, and in many respects one of the most remarkable men of his time, was born in Cape Colony in 1825. He joined his family in the "great trek" of 1834-6, when more than 6,000 Boers left British territory and trekked northward into the wild and mountainous country where the Transvaal republic was afterward founded.

Kruger was born with a love for adventure and while yet too young to handle a gun became expert with the bow and arrow. While still a mere boy he was famous for his courage and skill with the rifle. He was barely in his teens when he took part in the great battles which drove Mosilikatso, the father of Loekengau, and his warriors north of the Limpopo river. He had received little education, only book in his boyhood being the Dutch family Bible. He read with delight the stories of the Israelites in their escape from bondage and their early wars, and finding a counterpart in his own experiences increased his ambition for military glory. He believed that to spoil the enemy was a cardinal duty. He so distinguished himself in the early wars of the Boers that at the age of 20 he was a district commandant. He rapidly rose through all grades of the service until he was not only com-

### Smokers' Jubilee.

In May the people of Berlin celebrated an anniversary which is a favorite one with them. Before May 23, 1832, no smoking was allowed in the streets or parks of Berlin and offenders were punished by a fine for the first infraction of the rule and by imprisonment afterward. The king of Prussia in those days detested smoking and the police and the military men were under strict orders to arrest anyone who dared to smoke in public. It is recorded that when Napoleon occupied Berlin a hundred years ago the Berliners eagerly took advantage of the opportunity to smoke and took a special delight in puffing smoke in the faces of the police, who had then no power to arrest them. In 1832, however, the restriction was withdrawn and since then the people have celebrated the anniversary with great joy.

Learned them from Papa.

Mamma—"They tell me you've been saying naughty words, Johnny. What do you suppose papa will say when I tell him?"

Johnny—"Praps he'll say them learned them from him, you know."

Fine Philippine Scenery.

Henry Savage Landor found

much fine scenery in the Philippines. He writes: "If once you see Penon de

Corn island you will never forget it."

## EXCURSION ENDS IN DEATH

Twenty Killed at Glenwood, Illinois, in Wreck of Train Bearing Sunday School Picnic—Responsibility Not Yet Fixed.

Twenty persons were killed, sixty-eight seriously injured and half a hundred others scratched and bruised at 6:30 o'clock Wednesday afternoon at Glenwood, Ill., when an excursion train of eleven coaches on the Chicago & Eastern Illinois railroad, bearing 654 members of Doremus Congregational Chapel of Chicago crashed into a loaded coal train.

The excursion train left the picnic grounds at Monee, Ill., at 6 o'clock. The entire day had been spent at games and outdoor pleasures, and the tired crowd of men, women and children was being hurried to their homes in the vicinity of the church at Thirty-first and Butler streets.

The engine, baggage car and one passenger coach were crushed in the collision. All of the dead and most of the injured were in the first coach.

### Dead in First Coach.

Orders misunderstood, or negligence of the train crews, is believed to have been the cause.

The excursion train, north bound, had been transferred to the south bound track, which was supposed to be clear.

All of the dead and injured were placed on board special trains and brought to Chicago, arriving at Englewood station at midnight.

The injured were removed to Englewood Union hospital, while the dead were taken to Thirty-third street on the relief train, and from there removed to the morgue, where several thousand anxious relatives crowded to look for their loved ones.

### Heartrending Scenes.

The scenes attending the identification of the bodies and the receiving of the injured from the trains has seldom been equaled in Chicago.

There are three bodies at the morgue that have not been identified. One is that of a small boy. The others will probably never be identified unless by the scraps of cloth that cling to the pieces of flesh now in the morgue. On one slab are the arms and legs of a small boy, while on another are the legs, one arm, and part of the trunk of a man.

### List of the Dead.

Fred Pantleers, aged 10; Walter Gormlinger, aged 15; Mrs. Gormlinger and baby girl daughter; Lena Bittner, aged 14; Andrew Kramer; Mrs. Ellen Landers, Mrs. Mary Cherry, Mitchell, boy, son of John Mitchell; superintendent of Sunday school; William H. Meyer, aged 12; John Poduka, aged 8; Mamie Poduka, aged 2; Mrs. E. E. Palmer, Emma Palmer, Miss Lorraine Palmer, two unidentified boys, who died at the Englewood Union hospital shortly after their arrival; two unidentified bodies, at the morgue.

The officials viewed the wrecked cars and examined the wreckage carefully, and then called before them the employees of the stations near Glenwood and the crews of the two trains which collided. It was found that Hoxey's engine, No. 114, drawing fifty coal and freight cars, was proceeding north on the track north of Chicago Heights, Wednesday evening, when it was discovered that, by reason of a knuckle or drawbar having dropped from its position, fifteen of the rear cars had been left behind on the northbound track.

The officials viewed the wrecked cars and examined the wreckage carefully, and then called before them the employees of the stations near Glenwood and the crews of the two trains which collided. It was found that Hoxey's engine, No. 114, drawing fifty coal and freight cars, was proceeding north on the track north of Chicago Heights, Wednesday evening, when it was discovered that, by reason of a knuckle or drawbar having dropped from its position, fifteen of the rear cars had been left behind on the northbound track.

Hoxey and his conductor are equally responsible for what occurred, as each had equal responsibility as to what should be done with the train, and if Cooper had done his duty he would never have allowed Hoxey to go from one track to another without orders.

"As in every other line of industry, there is a standard code for running trains. This is used by over 90 per cent. of the railroads in the United States. Every man who has been in the service for only a few months knows most of its important provisions. Changing from track to track without orders is one of the first lessons an engineer learns not to do. Hoxey and Cooper are guilty of violating one of the most iron-bound rules of our company."

Freight Engineer to Blame.

There is a heavy grade on this part of the line, and the engineer could not go back with the heavy load. So he decided to go on to Thornton, five miles distant, to push the cars he then carried over to the southbound track, and then return to get the fifteen lost cars on the northbound track.

Blame Engineer and Conductor.

The officials of the road, after a thorough investigation of the causes of the wreck, place the blame on the engineer and conductor of the freight train. The station agent at Glenwood informed the engineer that the excursion train was on the southbound track and urged him to get out of the way. He refused to take orders from the agent until shown a telegram. When he endeavored to reach Thornton, five miles distant, to push the cars he then carried over to the southbound track, and then return to get the fifteen lost cars on the northbound track.

The Tribune guarantees a circulation of over 1,200 copies each week.

### A Graceful Lover.

William Randolph Hearst proposes to do all he can for the success of the democratic ticket. In his papers he says editorially:

"Harmony," that should be the slogan of the democratic party. Let us have no more of the treason and sucking which for eight years have kept the democracy out of power. "There was fighting at the St. Louis convention, plenty of it, but everybody had his say, every faction was given a hearing. And the convention, having done its work, it is the duty of good democrats, loyally to accept the platform and take the ticket and exert themselves for the election of Parker and Davis.

The St. Louis platform is sound on the main things—the trusts and the tariff. Its whole spirit is thoroughly democratic, and any democrat can accept it in good conscience.

"It is high time that the blows which democrats have been delivering upon one another should fall upon the republican party. Surely there is enough in that organization and its presidential candidate to rouse in democrats, radical and conservative alike, the spirit of enthusiastic opposition.

"Judge Parker is a man of dignified position and gravity of character, and when he writes his letters of acceptance and breaks the silence he so long has maintained on all questions save the gold standard he with毫不踌躇 speaks in such a way as to rally to his side those democrats who would have preferred some other candidate.

"With a united democracy and a leader standing for government by law instead of government by caprice and favor, the battle against the republican party can be won."

**Full Privileges for the Blind.**

Blind persons have special privileges under Uncle Sam's postal regulations. They pay no postage for books to and from public libraries and public institutions.

Postmaster General Payne has notified all postmasters and all the postal authorities that books, pamphlets and other reading matter in raised characters for the use of the blind, whether prepared by hand or printed, in single volumes not exceeding four pounds in weight, or in packages not exceeding the same amount in weight, and containing no advertising or other matter whatever, shall be transmitted in the United States mails free of charge.

This, however, is on several conditions.

"The matter must be unbound and must be sent by public institutions or public libraries as a loan to blind institutions, or by such renderers to such institutions. The matter must be so wrapped as to be easily examined.

The book or package must not weigh more than 10 pounds. The name and address of the sender must appear on the envelope, as well as the inscription that it is "Free" and "Pending matter for the blind." Letters written in raised characters or point print for the use of the blind are not included in the free list.

Jackson Milling Company will Encourage Elevator.

H. H. Pagel, manager of the North Star Mills, spent the day at Grand Rapids in attendance at a meeting of the directors of the Jackson Milling Co. At this time the directors authorized Mr. Pagel to proceed with his plans for the enlargement of the elevator at the local mill, increasing the storage capacity from 8,000 to 22,000 bushels. The elevator is 260 feet, plank crib construction, covered with steel sheet. The building will be carried up to the full height of the mill, a distance of about 25 feet. Mr. Pagel is already prepared to receive figures on the work and construction will be commenced in a few days, or as soon as the contractor can be let. This improvement has been needed at the mill for some time and all will be pleased to see this evidence of progress and prosperity for a local industry.—Stevens Point Journal.

AT THE WRONG END OF DAY.

Mistake of a Bibulous Business Man

Who Is Now "On the Wagon."

Here's a story which a downtown business man tells on himself and it contains a temperance lesson: One night he was at the club until late. Instead of going straight home when his thirst had been soothed by a plentiful supply of liquid refreshments he called at several speakeasies, and by the time the wee' sma' hours were at hand the bibbler was about sixteen sheets in the breeze and still sailing. How he got home he cannot remember, but some friend evidently plucked him there.

When he awoke he discovered that he had been too stupid to notice and had dropped into a chair, where he had slept with his clothes on. He had a glorious headache and his tongue felt like a piece of chamois skin. He glanced at his watch. It was not yet 6. Closing the door, which he had left ajar, he washed his face, brushed his hair, changed his soiled and wilted collar for a clean one and massaged the bed to make it look as though it had been occupied during the night. Then he went into the sitting room, congratulating himself upon his good fortune in awakening before the hour of 6. His cheery "good morning" was rather oddly received, and, realizing that something was radically wrong, the guilty went back into his bedroom and reflected. During the course of these reflections darkness commenced to settle down.

It then dawned upon the business man that instead of being morning it was 6 o'clock in the evening. Developments proved that he had staggered into the house about daylight and, being unable to arouse him, the family had in disgust permitted him to snore away in the chair. He mutely acknowledged the joke and mounted the water wagon, upon which vehicle he is now riding.—Pittsburg Dispatch.

No Cause for Uneasiness.

"Buffalo Bill" was one exhibiting in Boston, and while giving a little reception at his tent at the close of the afternoon performance he was approached by a young man and his mother. After a moment of embarrassment on the lady's part she said:

"Do you consider that you give a true picture of Western life?"

"We try to, madam," answered Mr. Cody.

"The people really ride about and shoot in that terrific manner, do they?" she continued.

"Well, yes; on occasions," the showman replied, rather guardedly.

"I never suspected it," went on the lady in some agitation. "Most of the money left me by my husband is invested in the West, but I now feel doubtful about allowing any more of it to go there."

"Is it secured by first-class real estate mortgage?"

"I believe so."

"Madam," said Cody, with confidence, "do not give yourself the least uneasiness. In all my experience with the West, I have never yet seen a first mortgage on real estate riding a bucking bronco shooting up the town, or doing anything except grimly drawing its twelve per cent per annum. I wish I owned a million of 'em."

India's Magnetic Plant.

There has been discovered in the forests of India a plant which possesses astonishing magnetic power. The hand which breaks a leaf from it immediately receives a shock equal to that which is produced by the conductor of an induction coil. At a distance of twenty feet a magnetic needle is affected by it, and it will be quite deranged if brought near. The energy of this singular induction varies with the hours of the day.

It is absolutely annihilated during the night. At times of storms its intensity amounts to striking proportions. Birds and insects never alight on this plant.

## BACK LICK

Settled the Case With Her.

Many great discoveries have been made by accident and things better than gold mines have been found in this way, for example when even the accidental discovery that coffee is the real cause of one's sickness proves of most tremendous value because it locates the cause and the person has then a chance to get well.

"For over 25 years," says a Missouri woman, "I suffered until agonies in my stomach and over the best physicians disagreed as to the cause with-out giving me any permanent help, different ones saying it was gastritis, indigestion, neuritis, etc., etc., so I dragged along from year to year, always half sick, until finally I gave up all hopes of ever being well again.

"When taking dinner with a friend one day she said she had a new drink which turned out to be Postum and I liked it so well I told her I thought I would stop coffee for awhile and use it, which I did.

"So for three months we had Postum in place of coffee without ever having one of my old spells but was always healthy and vigorous.

"His husband kept saying that he was convinced it was coffee that caused those spells, but even then I wouldn't believe it until one day we got out of Postum and as we lived two miles from town I thought to use the coffee we had in the house.

"The result of a week's use of coffee again was that I had another terrible spell of agony and distress, proving that it was the coffee and nothing else. That settled it and I said good-bye to coffee forever and since then Postum alone has been our hot meal-time drink.

"My friends all say I am looking worlds better and my complexion is much improved. All the other members of our family have been benefited, too, by Postum in place of the old drink, coffee. Name given by Postum Co., Battle Creek, Mich.

Ten days trial of Postum in place of coffee or tea is the wise thing for every coffee drinker. Such a trial tells the exact truth often where coffee is not suspected.

Look in each page for the famous little book, "The Road to Wellville."

## A Companion

He often brings me pleasure,  
It sometimes brings me pain;  
He fills our hearts with trouble,  
Then cheers us up again.

He gives us introductions,  
But fails to make amends;  
For the pleasure of some,  
We give the pleasure of friends.

The smiling cheek of beauty,  
She smiles with slow decay;  
The raven locks of manhood,  
He surely strikes with gray.

At each step on life's ladder,  
That we expect to climb,  
We are brought down again.  
Old, ruthless Father Time.

## DENCOPE'S PROPOSALS

By SWIFT ADAMS

Copyright, 1902, by The Shorter Pub. Co. All rights reserved.

"I think I'll get married," said Penelope to herself, as she sat in a quiet corner on the veranda of the Seaside hotel.

Penelope was young and pretty. No level-headed person would ever have thought of making an assertion that, by any possibility, could be construed as contradictory to such plausible facts. And every man at the hotel was held over head in love with her.

After having reached this important matrimonial decision, she charged along the piazza, so wrapt in her cogitations that at a sharp turn she bumped, with considerable violence, into Tom Halloway.

"Oh!" she gasped, "I beg your pardon! I—"

"You can't have it," interrupted Tom. "There's no reason why I should give it to you. It was delightful."

"Tom Halloway, aren't you astounded?"

"Not at all," said Tom. "Let's play golf."

"But it's so hot," protested Penelope. "Even the cadavers are asleep."

"Never mind," said Tom. "Then we'll have the links all to ourselves. Come along."

Tom was on his knees, making her toe, when it happened. Penelope stood close by him. Suddenly he seized her hand.

"Penelope, dearest, for a long time I have wanted to tell you something. I want to say" (she fervently kissed her hand) "that I—"

"Oh, Tom!" screamed Penelope. "Whatever is the matter?"

Tom had jumped to his feet and was wildly grabbing at his mouth and choking. He had planted a passionate kiss on a wad of damp sand that, in his excitement, he had pressed into her hand.

"Hello, what's up?" and Bob Hamilton, who had heard Penelope scream, came running out of the club house.

"—I guess Tom has some sand in his mouth," said Penelope.

"Good," said Bob; "it's good for his digestion. But how on earth—"

He stopped short. Neither of his listeners was in a condition to utter an intelligible answer. Tom made a break for the pump, and Penelope was sitting on the ground, sobbing with laughter.

"Is it secured by first-class real estate mortgage?"

"I believe so."

"The people really ride about and shoot in that terrific manner, do they?" she continued.

"Well, yes; on occasions," the showman replied, rather guardedly.

"I believe so."

"The people really ride about and shoot in that terrific manner, do they?" she continued.

"Well, yes; on occasions," the showman replied, rather guardedly.

"I never suspected it," went on the lady in some agitation. "Most of the money left me by my husband is invested in the West, but I now feel doubtful about allowing any more of it to go there."

"Is it secured by first-class real estate mortgage?"

"I believe so."

"The people really ride about and shoot in that terrific manner, do they?" she continued.
